- Computer software on CD-Rom or via the internet; and
- Verbal information to the learner on a face basis or through local or national help line services Advice requires more interaction with the learner, usually on a one to one basis.

It may require explanation of some of the information provided, how to access and use information, and a recognition of when more in-depth services may be required by the learner.

Guidance is an activity carried out by an advisor which helps clients to explore a range of options, to relate information to their own needs and circumstances to make decisions about their career (i.e. their progression in learning and work).
